GLM-Bmaxx 120

BIZERBA

GLM-Bmaxx 120 ... simply a better experience with every label. The automatic weigh price labeler GLM-Bmaxx 120 makes things easy for you. It can be easily integrated into conveyor systems and data systems and thus ensures correct labeling from the case to the pallet. With the powerful processor the it is optimally prepared for your current and future requirements.

More information
High performance with a wide range of solutions and options.

Product description

Devices of the GLM-B series can be used as OEM belt labeler in stand-alone operation or can be directly controlled by EDP systems. Thanks to the Bizerba system design, it is also suitable for use as a sum value printer for price labeling lines and checkweigher lines. Since it smoothly integrates into existing conveyor technology the Ethernet-capable GLM-Bmaxx can also be used in connection with the dynamic scales Bizerba CWL-L and in Bizerba DWS systems (dimensioning, weighing, scanning). In the GLM-Bmaxx, label rolls with a diameter of up to 300 mm can be processed. Thus retrofitting time is reduced - especially with large labels. The printers are network compatible and can also be controlled directly via the Internet. The new PC-based hardware provides more memory space and fast label data processing. The operating terminal GT-7C with color display can be operated ergonomically and thus reduces operating errors. Moreover, an operating terminal with color touchscreen is optionally available.

GLM-Bmaxx 120 S

Highlights

– Flexible fields of application for labeling of cases, boxes and pallets in production, warehousing and distribution logistics
– GT-7C operating terminal with a 7" color display, optionally GT-12E or GT-12C with a 12" color touchscreen
– Printing of UNICODE fonts
– 2 GB memory on board for article and layout data
– Program updates, line backups, backups and service printouts are possible via the external USB port
– Thermal direct and thermal transfer print
– Printing and processing of any one and two-dimensional standard barcodes, among other things data matrix and QR code
– Easy label roll change
– Servicing of printer unit without tools, e.g. replacing thermal printhead or pressure roller

GLM-Bmaxx 120 T

Options

– Thermal transfer device
– Printing mechanism 80 mm, optional width 104 mm
– Mounting stand
– 12" color touchscreen

GLM-Bmaxx 120 S with 12" color touchscreen GT-12C

My Bizerba

We offer you solutions from a single source which can be customized and allow you to respond to any change in a flexible manner. Benefit from costs which can be planned and efficient processes. We are happy to advise you.
