solutions and options.

Product description

The dynamic checkweigher CWHmaxx combines finest weighing technology with demanding hygienic design. It checks up to 250 packages per minute and safely rejects non-conforming products from the production process. In combination with an integrated metal detector the CWHmaxx ensures your quality standard. Products containing undesired foreign metal objects are safely rejected. Each system will be individually manufactured to suit your requirements. Irrespective of the selected metal detector, rejection systems and belt dimensions the system stands on only 4 stable feet. There are less dirt corners and cleaning is easier. Thanks to the stable single frame construction the entire system can be easily relocated. Fitted with 3 conveyor belts, a 12" color touch screen with graphical user interface the CWHmaxx is perfectly suitable for quality assurance: You gain 100 % control over fill quantity, sorting and classification of your products.

CWHmaxx

Highlights

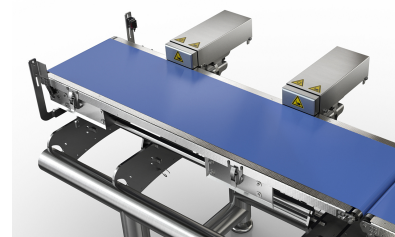

- Protection type IP65 or IP69
- Hygiene Design: open design with smooth surfaces made of high quality stainless steel
- 12" color touchscreen
- Weighing range: 50 g to 6 kg
- Maximum throughput of 250 packages per minute
- Maximum belt speed up to 120 m per minute
- Compact system on a stable base frame with 4 feet
- Three belts in standard version included (IFC, WC, DC)
- In the standard up to 6 belts can be controlled (IFC, IXC, WC, DC1, DC2, DC3)
- Memory for up to 100,000 items
- Individual design of display, operating elements and processes
- 80 weight classes
- Stainless steel version 1.4301
- Belt unit and quick-change belt system
- Web interface and remote service
