

# SmarterSlicing

## Operator and management support

An intelligent proactive support which makes your processes easier—this is SmarterSlicing. The slicer informs the operator about upcoming actions at an early stage. At the same time it provides the management with monitoring data. Thus, you ensure high quality of your products and optimize your processes.

### Highlights

- Digital indicator icons on the operator display
- Data displayed on the dashboard for easier management and monitoring
- 24/7 data access
- Efficient service

### Optimized processes

The SmarterSlicing functions support you in obtaining perfectly sliced fresh products at any time. The slicer's operator display automatically shows the operator if one of the following actions is due:

**Hygienic cleaning** To ensure that the hygienic requirements of the quality management are met, the **cleaning indicator** is shown on the display. You customize the time interval to your needs.

**Early maintenance** When exceeding a defined limit value, the **maintenance indicator** prompts you to perform the respective maintenance activities.

**Sharpening at the right time** With the **blade-sharpness indicator** you achieve a constant slicing quality of your fresh products. This indicator automatically determines the best point in time to sharpen the blade based on your daily workload.

### Your advantages with SmarterSlicing

- You easily meet the quality requirements of your customers and ensure the slicer's availability.
- Your staff can concentrate on advising customers and selling.
- Maintenance works as well as blade sharpening are carried out in good time. You save costs and increase the service life of the blade.
- You gain transparency in terms of device monitoring and inventory. The ideal basis for efficient process optimization.
